

Penstocks | Sluice Gates |

Sluice Gates

“

Penstocks and sluice gates used as water flow control equipments in channels and on weirs.

”

City Makine manufactures two types of penstock equipments as channel mounted and wall mounted.

Material thickness is calculated according to potential water pressure that is applied to penstock's surface.

Material may be AISI 304, AISI 316 stainless steel or st-37 carbon steel with epoxy protection dyed.

Drive can be achieved by hand wheel or motorized actuators.

All of the dimensions are custom desing.
